

Bon Secours Home Care for Your Patients

When your patients need continuing skilled medical care after discharge from the hospital or to help with long-term medical conditions, refer them to Bon Secours Home Care for:

- **Post-surgery care:** wound care, help with complex treatments, or medication management;
- **Chronic conditions:** including heart failure, COPD, kidney disease, or diabetes;
- **Telemonitoring:** needing monitoring, but don't want to enter a nursing home or skilled facility;
- **Orthopedic care:** therapy, medication management, and mobility help after spine surgery or hip, knee, or shoulder replacements.

Benefits for You and Your Patients:

Before-discharge support saves you time –

We'll meet with you, your patient, and their family prior to discharge to help coordinate necessary care and services for the home.

Home care helps your patients heal faster –

Our specially trained and highly skilled caregivers provide personalized care in your patients' homes for faster, successful healing.

Reduced complications decrease readmissions –

Home health care reduces medical complications and helps avoid readmission to the hospital.

Collaboration – We'll work with you to provide the specialized care your patients need and keep you up to date on their progress.
